ISO/IEC 27005 is developed on account of helping organizations improve the information security risk management, and minimize the risk of business disruption. Although it does not mention them, as a matter of the employment of risk treatment, the standard allows methods such as OCTAVE, EBIOS, MEHARI, and NIST 800-30.

PECB - ISO/IEC 27005 Information Technology - Security ...

Talking of opportunities, rewriting '27005 presents a golden opportunity for SC 27 to reframe it as a standard on information risk management where 'information risk' might be defined along the lines of "risk pertaining to information". Among other things, that would remove references to 'information security risk', a curiosity of the current standards.

ISO/IEC 27005 risk management standard

ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.
