Solution: There are 4 letters in the word love and making making 3 letter words is similar to arranging these 3 letters and order is important since LOV and VOL are different words because of the order of the same letters L, O and V. Hence it is a permutation problem. The number of words is given by $4 P 3 = 4! / (4 - 3)! = 24$. Combinations

Permutations and Combinations Problems

Solution: Permutations : A permutation is a sequence containing each element from a finite set of n elements once, and only once. Permutations of the same set differ just in the order of elements. $P(n) = n!$ Permutations with repetition n 1 - # of the same elements of the first category n 2 - # of the same elements of the second category

Permutations - examples of problems with solutions

Solution. This problem can be solved using permutations counting techniques. We have 6 symbols in total but note that they are not distinct. For example if we have 6 different symbols then the number of permutations or different signals that we can generate is 6 factorial however in our case we have 3 symbols (R G B) and
