An online taxonomic guide This Guide is designed both for those needing help in identifying phytoplankton species, as well as experienced taxonomists. It offers several avenues to find a particular species of interest. Once your species of interest is located, you will be taken to an Organism page that lists taxonomic details about that species.

LUMCON's Guide to Phytoplankton - An online taxonomic guide

This Phytoplankton Identification page is affiliated with CeNCOOS and HABMAP, and is maintained by the Kudela Lab at the University of California Santa Cruz. Details about site history, funding, and sources of information and images can be found here. here.

Phytoplankton Identification Gallery

Phytoplankton are identified and counted to Division, Genus, or Species level using optically clear slide mounts. Algal concentration with or without biovolume (as specified by client) is determined. Typical turn-around time is 16 weeks, but samples can be expedited for an additional fee. Counts include permanent archival slides (3 per sample).

Phytoplankton Analysis - PhycoTech

The success of zooplankton estimation and productivity would largely depend upon the use of correct methodology which involves collection of samples, fixation, preservation, analysis and

computation of data. The detailed procedures on all these aspects are given in this manual.

Zooplankton Methodology, Collection ... - drs.nio.org

efforts have resulted in preparation of this manual. This manual provides details of taxonomic classification and description of the concerned organisms /species.
