Less equipment means less parts to become problematic as the engine ages, thus giving air-cooled engines a naturally longer life span. Air-cooled engines are also less bulky, less heavy, and have a higher fuel economy, as 5-10% of their power isn't spent maintaining an enclosed liquid cooling loop. Not to mention there is no need to regularly monitor coolant levels. You work hard enough as it is, let your YANMAR engine at least take that task off your plate! 3.5 kW - 7.4 kW.
