The B18B1 became a popular engine swap candidate, often referred as an "LS swap" among Honda enthusiasts. The 1.8L made 142 hp and 127 ft-lbs of torque, but also became a donor for the LS/VTEC swap that became popular later on. Here is a B18B LS engine.

Techtips - An Introduction to the Honda B-Series Engine

The B-series are a family of inline four-cylinder DOHC automotive engines introduced by Honda in 1988. Sold concurrently with the D-series which were primarily SOHC engines designed for more economical applications, the B-series were a performance option featuring dual overhead cams along with the first application of Honda's VTEC system (available in some models).

Honda introduced the first B-series engine in 1989 as a performance engine with single and dual cams. All Japanese B series engines follow a four code series. The B designates that it is part of the B series. This is followed by a two digit number which details engine displacement. Lastly, there is a second letter for the model.
