In 1996 my book, Conquering Carpal Tunnel Syndrome and Other Repetitive Strain Injuries: A Self Care Program was published. The book details information about all of the upper body repetitive strain injuries, appropriate stretches and exercises, self awareness techniques and ergonomics information.

## **Sharon Butler: My Story**

Carpal tunnel syndrome (CTS) is essentially when a nerve in your wrist is under pressure. Carpal tunnel refers to the narrow passageway surrounded by bones and ligaments on the palm side of your hand.

## **How to treat carpal tunnel syndrome**

One way you can deal with carpal tunnel syndrome is by stretching your wrists 3-5 times a day to reduce pressure on your median nerve, which is the primary nerve that allows you to move your wrist. To do this, try placing your palms together and raising your elbows until you feel a stretch in both wrists.

Injuries: A Self-Care Program. This book offers a complete self-care program for those at risk and those already suffering from one of the most common and most debilitating occupational injuries. Guided by symptom charts, you select the best exercises for the movement patterns required by your work and learn how to restore the range of motion to overworked hands and arms.

## **Conquering Carpal Tunnel Syndrome and Other Repetitive ...**

Carpal tunnel syndrome, also called median nerve compression, is a condition that causes numbness, tingling, or weakness in your hand. It happens because of pressure on your median nerve, which runs the length of your arm, goes through a passage in your wrist called the carpal tunnel, and ends in your hand.
