Economic theory, which takes private markets and rational individual decision making as the norm, has developed techniques—primarily cost benefit analysis—to evaluate programmes funded by the public sector. As the earliest forms of cost benefit analysis measured both ...

Economic evaluation: an introduction | The BMJ

Theory based evaluation is an approach to evaluation (i.e., a conceptual analytical model) and not a specific method or technique. It is a way of structuring and undertaking analysis in an evaluation. A theory of change explains how an intervention is expected to produce its results.

Theory-Based Approaches to Evaluation: Concepts and ...

Economic theory implies a negative correlation between educational attainment and most types of crime. First, schooling increases the returns from legitimate work (relative to most types of crime) and may also socialize youth. Second, youth who plan to engage frequently in crime benefit little from a good education.
