Finding The Epicenter Skills Lab Answers Key Finding the Epicenter This lab activity is a good review to use to refresh your students on how to use a compass to find the epicenter. Students will have to read a seismogram. It also has students use page 11 in the ESRT's to find the distance to the epicenter. Finding The Epicenter Page 10/25

Finding The Epicenter Skills Lab Answers Key

To locate the epicenter of an earthquake, you must estimate the time interval between the arrivals of the earthquake's P and S waves (the S-P interval) on the seismograms from three different stations. The interval is measured to the closest second and then a graph is used to convert the S-P interval to the epicentral distance.

This is some parts of the PDF that you can take. And later than you in reality infatuation a book to read, pick this finding epicenter

Finding Epicenter Lab Answers - seapa.org

11. Describe the process of triangulation to locate an epicenter. Triangulation requires seismic data from three centers. First the distance from each center is calculated using the S-P interval and this distance serves as the radius for a circle around the center. The location where the three circles overlap is the triangulated epicenter.

Finding Epicenters and Measuring Magnitudes Worksheet

Finding an Epicenter An earthquake releases energy that travels through Earth in all directions. This energy is in the form of waves. Two kinds of seismic waves are P waves and S waves.

Locating the Epicenter of an Earthquake - YouTube

Your task will be to locate the epicenter for the earthquake using the arrival time of P-waves and S-waves from several seismic stations. Upon completion of the virtual lab, you will write a laboratory report of your results.

Lab Report Format for Earthquake Epicenter Lab by

At least 3 earthquake recording stations are required to find the location of the earthquake epicenter. A single recording station can only calculate distance, but not direction; to cover all possibilities, a complete circle is drawn around that station. If only two earthquake recording stations are used, the circles will overlap at two points.

Lab 10 - Earthquake Epicenter Location

Download Finding The Epicenter Skills Lab Answers Key - Skills Practice Lab Finding an Epicenter An earthquake releases energy that travels through Earth in all directions This energy is in the form of waves Two kinds of seismic waves are P waves and S waves P waves travel faster than S waves and are the first to be recorded at a seismograph station The S waves arrive after the P waves The time

Finding The Epicenter Skills Lab Answers Key

For Trial 1, I approach this like a very traditional lesson format - there are three (3) seismic stations necessary to triangulate the epicenter using a drawing compass, so I set up the lesson in a very "I do, we do, you do" format. The first trial, Chicago, I do a model of. Using the Earth Science Reference Tables [ESRT] (page 11), I fill in the table and ask students to follow along.
