As rich-Internet application (RIA) technologies mature, it is becoming increasingly important to integrate RIA applications, such as Adobe Flex, with robust server-side services. One of Java developer

Integrate Flex with Spring Framework - InfoQ

This means that I need to verify all CRUD methods from Flex to a running BlazeDS/Java server and back to Flex. I expect these integration tests to help verify that there are no client/server API mismatches and that all data-types are being converted properly. I need to set up the data for each test case and tear it down afterward.
