Calculated by taking the sum of the number of Sprint Round questions answered correctly and twice the number of Target Round questions answered correctly. There are 30 questions in the Sprint Round and 8 questions in the Target Round, so the maximum possible Individual Score is  $30 + 2(8) = 46$ . If used officially, the Countdown Round yields final individual standings.

The book does an excellent job in provide detailed step-by-step solutions to the problems. This book along with the other two companion books (11 years solutions for national and state sprint and targets) by the same author has become my 7th grader's favorite reference books for mathcounts competition practice.

## **Mathcounts National Competition Solutions: Chen, Yongcheng ...**

The target round should have problems from all four subjects. Once the test has been released, it is usually a good idea to keep the answers from being released at the same time. This can help prevent cheating, and also gives the problem solvers more time to make sure the problems are solved correctly.
