Kindly say, the matlab guide file type is universally compatible with any devices to read

Large photos of the Kindle books covers makes it especially easy to quickly scroll through and stop to read the descriptions of books that you're interested in.

Matlab Guide File Type

When you save a layout, GUIDE creates two files, a FIG-file and a code file. The FIG-file, with extension .fig , is a binary file that contains a description of the layout. The code file, with extension .m, contains MATLAB functions that control the app's behavior. Save and run your program by selecting Tools > Run.

Create a Simple App Using GUIDE - MATLAB & Simulink

Code Files and FIG-Files By default, the first time you save or run your app, GUIDE save two files: A FIG-file, with extension.fig, that

contains a complete description of the layout and each component, such as push buttons, axes, panels, menus, and so on.

Files Generated by GUIDE - MATLAB & Simulink

For example, if a file `myscript.m` exists, then the command `type myscript` displays the contents of that file. `type` leverages automatic character set detection to determine the file encoding for MATLAB code (`.m`) and other text files.

Display contents of file - MATLAB type

Matlab Guide File Type Typically, only files with a matching file extension are displayed. On some platforms, `uigetfile` displays files that do not match the filter, but dims those file names. If the filter is missing or empty, `uigetfile` uses the default list of file types (for example, all MATLAB ® files).
