Furthermore, due to the increase of patients with multimorbidity and polypharmacy, medication review especially in patients with many drugs is often neglected. Pilot data from the Netherlands showed that a software-assisted method, called STRIPA, was effective for optimizing pharmacotherapy in primary care.

Optimizing Pharmacotherapy In the Multimorbid Elderly in ...

Gout results from physiologic disturbances of urate metabolism which lead to hyperuricemia. Normal uric acid levels are near the limits of urate solubility because of a delicate balance that exists between the amount of urate produced and excreted. 7 Hyperuricemia is defined as a serum urate level of >7 mg/dL in men or >6 mg/dL in women. 4 In the hyperuricemic state, uric acid salts form ...
