However, there are nevertheless many people who as a consequence don't following reading. This is a problem. But, past you can support others

Sharepoint 2010 Document Set Limitations

Boundary. When SharePoint Server 2010 is configured to use RBS, and the BLOBs reside on NAS storage, consider the following boundary. From the time that SharePoint Server 2010 requests a BLOB, until it receives the first byte from the NAS, no more than 20 milliseconds can pass.

SharePoint 2010 boundaries, thresholds and supported limits

The number of files within a document set ranges from 0 to 65, and they are grouped according to the contents of one metadata field. Overall the number of documents in the library had exceeded 5000.

5000 Limit on a SharePoint Library - Microsoft Community

Items in lists and libraries. A list can have up to 30 million items

Download File PDF Sharepoint 2010 Document Set Limitations

and a library can have up to 30 million files and folders. When a list, library, or folder contains more than 100,000 items, you can't break permissions inheritance on the list, library, or folder. Nor can you re-inherit permissions on it.

SharePoint limits - Service Descriptions | Microsoft Docs

Note that the options are slightly different. In the list context we can choose a unique view for the Document Set-based Content Type. That means in my library, I could have 14 different views of the Document Set contents, one per Content Type, should I choose to do so. Summary. Document sets are awesome. The 5000 item limit is not. References

Wherein I Profess My Love for Document Sets, My Hatred of ...

Same way as into "regular folder." You can either use the Upload button or just drag and drop documents into the document set. Document Set limitations It is all about documents. It is a limitation by default. But If you are thinking of using document sets to manage small projects, all you have on a welcome page is a document set.

Document sets - the hidden gem of SharePoint - SharePoint ...

There are a few other good articles that outline document set limitations and considerations, which I will try not to repeat: Document Set Limitations and Considerations in SharePoint 2010; Document Sets in Sharepoint 2010 - Limitations; These are some things that I have discovered: SharePoint 2016 Document Set: Sequence of Allowed Content Types

SharePoint 2016 Document Set: Bugs, Limitations and ...

Document Sets were newly implemented in SharePoint 2010 and not without limitations so folder functionality could not be eliminated. The single limitation I found that most impacted our implementation of Document Sets was the inability to declare Document Sets as in-place records, meaning you can only declare them as records in a Records Center.
