The first three essays in Universal Representation, and the Ontology of Individuation consider these issues as they play out in the metaphysics and natural philosophy of Avicenna, Averroes, Thomas Aquinas, Ockham and others. The last three essays turn to the metaphysical problem of the nature of the principle of individuation.

Universal Representation Learning of Knowledge Bases by ...

An ontology-based representation leads to capture and reuse universal design knowledge during this iterative process. It has the following benefits: (i) greater access to knowledge, (ii) more efficient problem handling, (iii) more promising integration structure between each operation and (iv) reduced time for knowledge indexing and searching.

An ontology-based universal design knowledge support ...

To lay down the theoretical foundations of the knowledge society technologies, it is set forth a unifying account of entities and relationships as the reality representation and reasoning (RRR) framework in the form of unified framework ontology or universal formal ontology (UFO), the overlap between

Ontologies. A universal ontology can be defined as a common, foundational, higher-level ontology that describes reality, its nature, composition, structure, meanings, and classes.

Universal Ontology of Geographic Space: Semantic ...

The SCD Ontology (SCDO), which is a community-driven integrative and universal knowledge representation system for SCD, overcomes this issue by providing a controlled vocabulary developed by a group of experts in both SCD and ontology design.

Sickle Cell Disease Ontology: enabling universal sickle ...

Ontology is the philosophical study of being. More broadly, it studies concepts that directly relate to being, in particular becoming, existence, reality, as well as the basic categories of being and their relations. Traditionally listed as a part of the major branch of philosophy known as metaphysics, ontology often deals

Ontology - Wikipedia

"Ontologies" consist of representations of things that are detectable or directly observable, and the relationships between those things. There is no universal standard terminology in biology and related domains, and term usages may be specific to a species, research area or even a particular research group.
