### Vtech Engine

VTEC (Variable Valve Timing & Lift Electronic Control) is a system developed by Honda to improve the volumetric efficiency of a four-stroke internal combustion engine, resulting in higher performance at high RPM, and lower fuel consumption at low RPM. The VTEC system uses two (or occasionally three) camshaft profiles and hydraulically selects between profiles.

### VTEC - Wikipedia

In Honda's VTEC engine, the camshaft has two different lobe sizes: Two standard-sized outer lobes and a larger center lobe. At lower rpm, only the outer lobes are controlling the valves.

### Honda VTEC Engines Explained - autoevolution

VTEC (which stands for Variable Valve Timing and Lift Electronic Control) is an electronic and mechanical system in some Honda engines that allows the engine to effectively have multiple camshafts. As the engine moves into different rpm ranges, the engine's computer can activate alternate lobes on the camshaft and change the cam's timing.

### What does the VTEC system in a Honda engine do ...

VTEC is a huge pain in the neck to engage in daily driving since it only operates in the narrow band of high RPM. So a 2.2 H22 is rated at about 200 hp max, but in reality it feels as a 160 hp 160 lb/ft engine because you just don't get to VTEC zone that often (think dropping to the 3rd gear on the highway and flooring it).
