ZBrush is a digital sculpting and painting program for the design of 3D images. It gives you all of the tools needed to quickly sketch out a 2D or 3D concept. You can create realistic renders directly in ZBrush with lighting and atmospheric effects. Designed around a principle of circularity, the menus in ZBrush work together in a non-linear and mode-free method.

ZBrush is a digital sculpting tool that combines 3D/2.5D modeling, texturing and painting. It uses a proprietary "pixel" technology (see below) which stores lighting, color, material, orientation, and depth information for the points making up all objects on the screen. The main difference between ZBrush and more traditional modeling packages is that it is more akin to traditional sculpting.
